

REASONS FOR DECISION

FILE NUMBER: 7408866

APPLICANT: Terrane Metals

PURPOSE: To construct and operate an electrical power line on Crown land

BACKGROUND: Terrane has received an environmental assessment certificate from the Environmental Assessment Office, and is now pursuing individual permits and authorizations for construction and operation of their proposed mine site. A *Land Act* tenure is required for construction and occupancy of Crown land for the power line which will service the mine.

DECISION: Tenure Offered

REASONS FOR DECISION:

- The project has received Environmental Assessment Office certification
- Potential impacts to Aboriginal interests have been identified and discussed
- The proposal is consistent with policy and government objectives
- No significant environmental impacts have been identified
