

TM Mobile Inc. File BC0280 Purden Lake

Application for a Tenure – Access

Management Plan Details

Section A – Project Overview

The purpose of this Project is to install a cellular telecommunications tower, antennas, equipment shelter and related equipment, in order to provide coverage to presently under-serviced areas of the Highway 16 and adjacent lands. Tenure is also required for Access to the proposed Site.

The area for the proposed Access, based on a combined 30 metre width with a proposed Power Line corridor, is 7.97 hectares.

Construction is planned for 2011. This Site is part of a planned expansion of cellular communications facilities between Jasper and Prince George.

Section B – Project Description

The enclosed Plans detail the proposed construction and Access location.

A detailed Management Plan is not currently available. In the event an Offer of Tenure is forthcoming, TM Mobile Inc. acknowledges that a condition of the Offer may be the provision of a detailed Management Plan.

Access will be gained from Highway 16, then to the Tower Site via existing trail, which will require some upgrading.

Section C – Additional Information

Environmental – Logging required to accommodate the proposed Access is indeterminate at present, however preliminary inspection indicates a combined width of 30 metres for Access/Power Line will be required in order to provide necessary clearing in order to prevent fire hazard. A Licence to Cut will be applied for in the event that logging is required. The Applicant will participate in any required environmental studies.

Socio-Community – This area is currently under-serviced. The proposed installation will provide enhanced coverage for the Yellowhead Highway and adjacent lands. The Applicant will participate in any required archaeological or related studies.
