Management plan:

This application is for a spike camp allowing Angling Guide Jeff Vermillion and his clients to float the upper Sustut River. Normally we fish this area by jet boat. This has been done for over 35 years. In recent years, due to years of drought and low water, this area can no longer be accessed most years. This site will allow our guests to access the Upper River, below the confluence of the Bear, and do an overnight camping trip with our guides. The camp will be used from August 24th to November 1st. The maximum number of guests at one time will be 6 guests and one guide. The camp will be used roughly 5 days a week in low water years only.

It will have two temporary structures on wood platforms and a pit outhouse as described below.
