

AN

Please provide a sketch in the space below, showing dimensions of proposed dock and distance from both side property lines. See attached example(s).

Locate your dock a minimum of 3 metres inside the side property lines of the upland parcel (by extending imaginary property lines out into the water). Please locate the dock so as to minimize impact on neighbour's view, and consider the potential for future construction of neighbouring docks. (Refer to the Guidelines for more specifics).

PHOTOGRAPHS

To help us process your application, stand on the beach where the dock is proposed and take 3 photographs (one of the site the dock will occupy as well as a photograph of the shoreline in both directions).
